THE SUNDIAL

The Sundial is an appropriate piece to commemorate an anniversary such as Southampton's 125th year of incorporation. Telling time by using the sun has been in practice for many years which provides us with the necessary link to the past, and with modern technology having developed Solar Powered time pieces for personal wear, we have both contact with the present and are reminded of some of the exciting things that may be in store with future technological developments.

TIME CAPSULE

The pededal which holds the Sundial will have a Time Capsule placed in it following "HOMECOMING". Contained in the capsule will be commemorative peices of the 125th Anniversary, letters from the Mayor, Chairperson of the 125th and local artifacts. These pieces will be an interesting reminder of the 125th Anniversary if and when the capsule is ever opened
